---

Good morning all.

Yesterday afternoon we had a well-received briefing for Carl and Pam on the enforcement strategy for the surface contamination in the Grants Mining District. They have several questions for the team to address and some will require the team to coordinate closely with the NPL Site Teams. Specifically, Carl and Pam want to know how any enforcement actions could affect ongoing work at UNC, Homestake, and Johnny M. This will feed into briefings for the RA and HQ.

I am going to schedule a brainstorming session the week after next for the NPL site teams to meet with me and Enforcement to begin thinking about the impacts. The first draft of this presentation will be due to management on August 7 and will include a 15 minute update on the San Mateo Creek Basin HRS Package.

Regards,  
Kevin
